Every Jerith Aluminum Fence is backed by our Lifetime Warranty. This guarantee covers our products against rust, defects in workmanship and materials, as well as chipping, peeling, or cracking of the FencCoat™ finish for as long as you own your Jerith fence. We were the first fence manufacturer to include a Lifetime Warranty on its products. While other fences may offer a similar guarantee, consider why a Jerith warranty means so much more.

First, we have manufactured our aluminum fences for more than 50 years, so we know how well they hold up over time. Most competing products have been on the market for less than 10 years. They simply do not have the experience that we have in fencing.

Secondly, fences are the only product that we make. Therefore, we concentrate all of our research and development efforts into producing the best fence possible. This is of utmost importance to our growth and success as a company.

Finally, we test our fences to back up every claim we make. Producing the highest quality fences and standing behind our products 100% has helped us become the largest aluminum fence manufacturer in North America.

You must have confidence in the manufacturer of your fence or the warranty will have no value at all to you. Over the past 50 years, we have earned a reputation for delivering what we promise. And, we won an American Business Ethics Award to prove it! That is why Jerith's warranty means more to you.

Jerith®

Aluminum Fences of Distinction™

The Aluminum Fences displayed in this brochure have a distinctive appearance that will complement any home. Jerith fences offer the attractiveness and protection of traditional wrought iron fencing without the maintenance. They are available in a wide variety of styles, colors, and heights that add prestige and value to any property. No other fence will do so much to enhance the beauty of your home, pool or yard.

All Jerith fences are constructed of an exclusive high-strength aluminum alloy called HS-35™ (see page 14 for details). This remarkable material has the strength of steel, but will never rust, even in coastal areas or around swimming pools. Plus, Jerith's durable powder coated finish is guaranteed not to crack, chip or peel for as long as you own your fence. Our polyester powder coating, called FencCoat™, is an environmentally safe, high quality alternative to paint (see page 15 for details). When applied to a Jerith fence, FencCoat™ is twice the thickness and hardness of a typical painted finish. It is far more durable, fade-resistant, and scratch-resistant than other coatings, which is why we can give a Lifetime Warranty on our finish.

A Jerith fence is the best choice whenever you want elegant, long-lasting protection. Producing high quality products at reasonable prices has made Jerith an industry leader for over 50 years. Insist on Aluminum Fences of Distinction™ by Jerith – America's best-selling aluminum fences!

America's Fencing Choice™

Jerith...Still Made in America!

Jerith is a family business that is now in its third generation. We are the oldest and largest manufacturer of aluminum ornamental fences in North America. Decorative fences constructed from aluminum were first designed and manufactured by Jerith in 1961. Since that time, we have become a leader in the fencing industry. We are known for our high quality products and outstanding service.

All fabrication and assembly of Jerith products is performed at our 444,000 square foot Philadelphia facility, unlike many other aluminum fences and gates which are imported from China. We understand that our customers want the best value in fencing and prefer a fence that is made in America over an imported product.

We are constantly improving our fences and have several patents on our products. One of our latest enhancements is a hidden fastener that is used to attach the pickets to the horizontal rails in our fences and gates. These patented clips (U.S. Patent Nos. D573,012 & 7,819,390) are made from durable stainless steel that will last as long as you own your fence without loosening or breaking unlike screws or plastic pieces. The end result is a beautiful fence that doesn't have any fasteners showing!

Jerith offers a proud tradition of quality and service to our customers, and our fences are built to the highest standards in the industry. You will probably only purchase one fence for your home, so make sure it is a Jerith fence! No other fence manufacturer can match our combination of experience, quality and service.

A Fence to Fit Every Need

There are a wide variety of Jerith fence styles available in four colors and several heights. You can be sure that there will be a Jerith fence to enhance the beauty of your home, pool or yard.

Residential Fence Styles:

- #101** This traditional wrought iron design has its points even across the top.
- #100** Similar to Style #101, but with staggered picket tops.
- #111** This version of Style #101 is built to accept finials on the pickets instead of the standard spear points.
- #401** Similar to Style #101 but with a 1⁵/₈" space between pickets. This fence will keep most pets in your yard. The narrow spacing also makes it difficult for children to obtain a foothold on the fence.
- Concord** This distinguished wrought iron design has elegant curves connecting the pickets. Available with standard points or finials centered in the arch.
- #202** A classic design with a smooth rail on top rather than points. Our Best Seller!
- #200** Variation of Style #202 which combines the safety of a top rail with traditional spear points below.
- #211** This version of Style #200 allows finials to be used on the pickets below the top rail rather than the standard picket points.
- #402** 1⁵/₈" spaced version of Style #202 for those who do not want exposed points on their fence, but want the added security of a narrow space between pickets.
- #400** Similar to Style #200 but with a narrow 1⁵/₈" spacing between the pickets.
- Ovation** These two rail fences have a simple design specifically created to meet the pool enclosure code drafted by the U.S. Consumer Product Safety Commission.
- SafetyPup** Keep your furry ones safe with this design. A narrow 1-5/8" spacing along the bottom portion of the fence. Will NOT meet pool codes.

Jerith also offers a full line of Industrial Strength and Ornamental Wire style fences. Please call 800-344-2242 for literature and specifications on these products.

Regency – Our Premium Residential Fence

Jerith's prestigious Regency Aluminum Fences satisfy a growing demand for stronger residential fences that don't look like industrial products. Our Regency Fences use slightly larger components to create a 6' long section that is nearly 50% stronger than our standard Residential Fences for just a little more money. These noble fences seamlessly blend into any yard or pool area without appearing to be out of place.

The basic Regency Fence styles are Buckingham, Kensington, Canterbury and Windsor. In these classic designs, the pickets do not extend beyond the bottom rail to give a smooth, clean look. To create a truly "regal" appearance, these styles can also have decorative rings attached between the top two rails.

Everything you would expect in a Jerith fence is found in a Regency Fence. Our exclusive HS-35™ Alloy is used in every rail and post. The standard FencCoat™ finishes are available for every style. And, of course, every fence is guaranteed for as long as you own it!

If you want a stronger, more impressive fence for your home without having an industrial look, then a Jerith Regency Fence is perfect for you. Whether you choose our standard posts or the sturdier 2 1/2" square posts, a Regency Fence will surely make your home a stately manor!

Rest Easy with a Jerith Fence Around Your Pool

Jerith fence is the perfect choice to surround your swimming pool. Its aluminum construction eliminates rust, while its durable FencCoat™ finish withstands the moisture and chemicals found in a pool environment. Most building codes require swimming pools to have self-closing and self-latching gates around them. These safety features are standard on all Jerith walk gates. In addition, our pickets have less than 4" between them, so children cannot squeeze through.

Our two rail fence designs, Ovation and Sentry, were specifically designed to meet a Swimming Pool Enclosure Code developed by the U.S. Consumer Product Safety Commission (CPSC). These fences have nearly four feet of space between their two horizontal rails. This virtually eliminates the possibility of a small child climbing over this fence. Also, a child-resistant magnetic gate latch is standard on all Ovation gates. This magnetic latch keeps the release mechanism out of a child's reach and has a built-in keylock for added security. It is also available as an option for all other Jerith gate styles.

The chart on the right shows all of the Jerith fence styles and heights that meet the CPSC Pool Code. You will notice that there are a few "Modified" designs that are altered specifically to meet the Pool Code (These altered styles are shown below.) For 54" high Modified Styles #200, #211 and #202, the only variation from the standard designs is that the pickets do not extend below the bottom rail. Our 57" tall fences combine this same picket change with a narrowing of the gap between the top two rails, which allows our 57" Modified Styles #101, #111, and Concord to have at least 45" between the rails as the Pool Code requires.

Be sure to verify the requirements for swimming pool fencing in your area before ordering. There is a Jerith fence to meet nearly every code. Select the one that's right for you!

STYLE #202 MODIFIED

Style and Height Combinations to Meet Most Pool Codes

| 401, 402 | ✓ | | | ✓ | ✓ |
| 400, Buckingham, Kensington, Avalon | | | | ✓ | ✓ |
| Canterbury, Windsor | | ✓ | | ✓ | ✓ |

*Modified Styles

These fences meet pool codes that require a fence to be 48" above grade with either:

- (a) any rail spacing and less than 1³/₄" between pickets, or
- (b) one 45" rail spacing between the tops of two adjacent rails and less than 4" between pickets.

Gates will be self-closing and self-latching. Magna-Latch latches may be required for some gates to meet these codes. Check local building codes for your requirements before ordering.

Aero – An Aluminum Fence that is Different from the Rest

Our Aero™ Aluminum Fence is Jerith's newest premium residential product. In a 6' length, it is 50% stronger than our standard Residential Strength Fence and can hold over 500 lbs. of downward force. Aero Fence is truly unique among aluminum fences because of the rounded edges found on all of the aluminum extrusions. This little change creates a sleek, modern shape that is very distinctive.

Aero is fabricated by combining sturdier 1" x 5/8" pickets, 1 1/8" x 1 1/2" rails, and 2 1/2" posts extruded from our exclusive HS-35 Alloy. Even though the components used in Aero Fences are larger than our other residential fences, the rounded corners soften the appearance to keep it from looking out of place in your back yard.

The Aero styles are called Avalon, Coventry, Doria, and Elba, which are similar to our Residential 101, 111, 200, and 202 styles respectively. A two rail design, known as Sentry, is available as well.

Like all Jerith products, Aero Aluminum Fence is backed by our Lifetime Warranty, comes in our standard FencCoat™ colors, and is produced in several heights to meet your needs. So, if you are looking for something that is a little sleeker in design, Aero Fence is the right product for you!

America's Fencing Choice™

Jerith's Exclusive HS-35™ Alloy *The Strength of Steel Without the Rust*

You no longer have to choose between the maintenance-free ease of aluminum and the strength of steel for your fence. The best of both worlds is available only from Jerith. Through extensive research and testing, Jerith has developed an aluminum alloy called HS-35™. This remarkable material has the strength of steel without the rust!

Our HS-35™ Alloy has a minimum yield strength of 35,000 pounds per square inch (psi), which is significantly higher than the 25,000-33,000 psi strength found in many steel fences. Even more impressive is Jerith's advantage over other aluminum fences, which have yield strengths of only 16,000-25,000 psi.

Every post and rail in Jerith aluminum fences is extruded from our exclusive HS-35™ Alloy. While some aluminum fence manufacturers claim to use similar alloys, they seldom use it in both their posts and rails. In addition, Jerith is the only manufacturer that uses a high strength alloy in its pickets as well. They are over 50% stronger than other aluminum fences. We don't cut corners on the strength of our products!

An independent testing laboratory has proven that a typical Jerith Residential Fence can support over 350 pounds per section without any structural failure and our Regency fence can hold about 500 pounds! With strength like this, Jerith fences will certainly satisfy your fencing needs for years to come.

Always look for our logo on the sections, post caps, and gates to ensure that you are receiving Jerith quality and our exclusive HS-35™ Alloy. Other fences may look like Jerith, but none are as strong, durable or well-built as ours.

AZALEA ARBOR

JERITH LOGO STAMPED ON RAIL

FencCoat™ - Jerith's Powder Coated Finish

Jerith's technologically-advanced powder coating system allows us to produce a high quality, long-lasting finish which is also environmentally friendly. When applied to a Jerith fence, FencCoat™ is twice the thickness and hardness of a typical acrylic (or "wet paint") finish. Consequently, it is far more durable, fade-resistant, and scratch-resistant than other coatings, including the powder coatings used by our competitors.

To prove the durability of our powder coating, we have tested it extensively. FencCoat endured 3,000 hours of harsh salt-spray and humidity resistance, as well as 5 years of continuous exposure in Florida without failure. Similar tests performed on other aluminum and steel fences have shown that their coatings can't survive even 2,000 hours of salt-spray and humidity testing, and their finishes fade dramatically after just 1 year of Florida exposure.

Remember, any fence can look good when it is first installed, but the true test of a quality finish is how it holds up over time. Many of the photos in this brochure show installations that are several years old, yet the Jerith fence in them still looks like new. We are so confident in our FencCoat finish that we guarantee that it will last for as long as you own your fence. While others may guarantee their fence finish as well, the superiority of our coating over theirs will be obvious after a year or so.

America's Fencing Choice™

A Gate to Fit Every Personality

All Jerith fence styles have matching gates. The gates resemble the fence design, but with a welded frame and bracing for structural support. By fabricating in this manner, a Jerith gate can hold a 250 pound load without collapsing!

Our walk gates are self-closing and self-latching. These safety features are essential around a swimming pool to help prevent accidents involving children and pets. Our latches have a built-in keylock and are magnetically activated for a smooth operation that works every time.

If you are looking to differentiate your walk gate, consider using an Accent™ Gate. These attractive gates have gently arched top rails. They are welded without bracing to enhance the appearance of their curves. For a double gate with a single arch across the opening, you would want our Rainbow™ Gate. These are ideal to allow large lawnmowers or other equipment access into your yard.

STYLE #202 WALK GATE

STYLE #200 ACCENT GATE

For a truly impressive entrance to your home, install a Jerith Estate Gate. These beautifully arched double gates really show off your personal "Estate". These gates are constructed from larger aluminum components that are welded at every joint. The gate height increases by one foot from the lowest side of the gate to the highest side to create a dignified presence that will distinguish your entryway!

Since a gate is the only part of your fence that moves, its design and construction are critical to ensure years of trouble-free operation. No other gate can match the quality and strength found in a Jerith gate!
